Royale International Announces Strategic Collaboration with California Life Sciences (CLS) for Global Biopharma Distribution

Royale International is excited to announce its collaboration with California Life Sciences (CLS), aimed at delivering specialised end-to-end temperature-controlled logistics solutions for various biopharma sectors in the region.

California Life Sciences (CLS) is the leading membership organisation for the Life Sciences sector in California. With over 30 years of experience, CLS advocates for companies of all sizes, from startups to industry leaders in biotechnology, pharmaceuticals, and medical technology. By collaborating with universities, research institutions, and the investment community, CLS shapes public policy and promotes access to innovative solutions. With offices across California and Washington DC, CLS is committed to empowering discoveries that lead to healthier lives globally.

Royale International is excited about its newly formed synergistic partnership with California Life Sciences. Both companies are dedicated to advancing medical and scientific breakthroughs by providing solutions for seamless global interconnectivity. The core values of Royale Life Sciences focus on being patient-centric and offering tailored solutions through an integrated platform and extensive industry knowledge. This collaboration acknowledges the high-value expertise from the teams at California Life Sciences. It is expected to strengthen Royale International's bio-logistics services and provide education through joint webinars and communications to various biotechnology and pharmaceutical companies worldwide. Both companies are committed to delivering high-quality innovation, dedication to patient care, and seamless cold chain distribution.

Royale International and California Life Sciences will begin collaborative initiatives effective immediately.

About Royale International Life Sciences
Royale International specializes in handling and shipping sensitive, temperature-controlled products with extreme precision and care across the globe. The Life Sciences Division supports a wide range of sectors such as biotechnology, pharmaceutical, healthcare, medical devices, cell & gene therapy, clinical trials, and research & development. Royale's Industry Experts provide quality-driven and customized logistics solutions via On-Board Couriers (OBCs) and Express Air Freight, covering a wide spectrum of temperature ranges. Their global Quality Management System (QMS), accredited under ISO and GDP guidelines, ensures shipments safely arrive at the right place, at the right time.
